

## NetFax - Standalone fax server .

NetFax is a standalone fax solution designed for mid-sized business workgroups to send and receive faxes from the desktop. It offers significant time and cost savings by eliminating the need for printing faxes and the associated costs involved in consumables and maintenance of fax machines. No more waiting for your turn to send faxes, no more lost pages and paper jams, just easy convenient faxing for everyone from the office and from remote locations.

**Fax to Email and Email to Fax** — Receive and send faxes as email attachments from wherever you are.

**Document Security** - Integrates electronic safeguards for security and document delivery.

**Reliability** - Standalone system, does not rely on external servers or computer hardware to run applications.

**Flexibility** - Integrated FXS port allows connection to a physical fax machine if you need to scan documents .

**Customize Faxes** - Create page headers and cover pages, you can also add your signature.

**Fax Storage** - Huge capacity of up to 7500 pages allows easy storage and retrieval of faxes.

**Fax Broadcasting** - Send the same fax to multiple locations at the touch of a button.

**Automatic Inbound Routing** - Can be programmed to rout incoming faxes to inbox of recipients.

**Remote Send and Receive**— Access the Fax server even from remote locations to send and receive faxes.

**Fax Extension** - A physical fax machine can be connected for scanning documents.

## **Benefits - Paperless ! Saves Resources & Time.**

**Saves on printing and maintenance costs** - You don't need to print every fax you receive, print only what is needed and save on ink / toner , paper and fax machine maintenance costs.

**Enhances Business Efficiency & Employee productivity** - Sending and receiving faxes straight from your desktop at the click of a button will save you time to do important tasks. Eliminate the need for physical filing by archiving all your sent and received faxes in your desktop folder. You can quickly retrieve them for viewing or printing.

By receiving your faxes as email attachments you can view them from wherever you are , view them even on your mobile if you have email applications integrated. You can also access the NetFax server from remote locations to send faxes.

**Easy Set up** - Standalone box contains all software and hardware enabling quick and easy setup. Operates independently without the need for any servers, it can also store faxes.

**Fax Broadcast** - Send the same document to multiple recipients with one click.

**Email to Fax** - You can send faxes from anywhere as long as you are connected to the internet. Just email the attachment , the NetFax server will convert the email and send it as a fax.

**Fax to Email** - All received faxes will be automatically converted to PDF format and can be setup to be forwarded to users email account.

**System Log and Monitor** - NetFax provides detailed send received logs and also allows administrators to monitor all incoming and outgoing faxes.

**Fax Sharing / Forwarding** - Since NetFax runs on the TCP/IP network users can share and forward faxes within the LAN and over the internet.

**Secure and Reliable** - The NetFax provides safe and reliable faxing by integrating electronic safeguards for document security and delivery.

**Auto Distribution** - NetFax can auto distribute the received faxes to corresponding users based on user extension numbers. If the system is uncertain of the receiver, the faxes will be delivered to the administrator.

**Multiple Lines** Available in configuration ranging from 1 , 2 , 4 , 8 and 30 Telephone lines (E10 )

**System Ports**—RJ45 Ethernet port for LAN / Internet connection, FXO port for PSTN line connection, FXS Port for physical Fax machine connection.
