Yeastar MyPBX Billing System Addon

Billing System
Call first, charge later

Postpaid

Prepaid

Provide real-time billing and charging for extensions of MyPBX

MyPBX

Recharge first, call later

Statistics

Detailed statistics for traffic analysis

Billing System caters for the growing need of a billing solution that can efficiently monitor the calls and maintain record of each call received/transferred by MyPBX. Billing System can charge and recharge extensions and conduct analysis on the basis of statistics. Both prepaid and postpaid are supported. Flexible rate settings and detailed records make it extremely easy for enterprise to monitor charges, spot misuse, and enhance efficiency. With Billing System, call accounting are just clicks away.

Features

Prepaid and postpaid modes provide real-time billing and charging for extensions of MyPBX.

Prepaid

The extension is recharged first, and call fees are deducted from the balance right after the call ends. When the balance reaches the limit credit, the system will automatically limit the extension from dialing out.

Postpaid

Call fees are deducted from the balance right after the call ends. When the credit runs out, the system will automatically limit the extension from dialing out.

Account Management

Administrators can recharge extensions, set pay type, lock or unlock extensions, and check other account information.

Flexible Rating

Rate can be set according to extensions, time periods, call duration, call types (whether local or international, from landline or mobile phone).

Real-time Billing

The immediate real-time billing empowers the user by making rating, charging and balance and account management responsive, interactive and flexible.

Least Cost Routing

Find the most inexpensive way to route phone calls, allowing save on phone bills.

Detailed Call Logs and Statistics

Full recharging history, call logs, and statistic in detail for management and traffic analysis.
